

ONKAR SATALE

Pune, Maharashtra, India

+91 8446004736 | onkarsatale4@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Engineering undergraduate specializing in **Full-Stack Web Development** and **Generative AI**. Experienced in building enterprise-grade microservices and applications using **React**, **Node.js**, **FastAPI**, **Groq LLM**, **ChromaDB**, **MongoDB**, and **MySQL**.

EDUCATION

Pune Institute of Computer Technology

Bachelor of Engineering (CGPA: 8.75)

Sep 2023 – May 2027

Pune, Maharashtra

MBBS Junior College

Higher Secondary Certificate (HSC: 74.17%)

Jun 2022 – May 2023

Ahilyanagar, Maharashtra

EXPERIENCE

MERN Stack Developer Intern

LearnCraft Engineering

Mar 2026 – Jul 2026

Pune, India

- Developed a full-stack NGO platform using **MERN** stack to streamline volunteer management and event workflows.
- Implemented responsive frontend UI components and integrated scalable **REST APIs** using **React** and **Node.js**.
- Designed **MongoDB** database schemas and implemented secure user authentication with role-based access control (**RBAC**).
- Improved application loading performance and security using Express rate limiters, error middleware, and clean **Git** practices.

PROJECTS

PackMate – AI-Powered Travel Assistant | React, Node.js, Express.js, FastAPI, MongoDB, ChromaDB

Live Demo | GitHub

- Architected a microservices platform using **React**, **Node.js**, **Express.js**, and a **FastAPI** service powered by **Groq (Llama 3)**.
- Built a **RAG** travel chatbot using **ChromaDB** vector embeddings and integrated Vision LLM for suitcase photo scanning.
- Integrated OpenCage API for real-time weather packing lists, Cloudinary CDN photo storage, and streaming **.docx** exports.
- Implemented **JWT** authentication with token rotation, bcrypt password hashing, and deployed on **Vercel & Render**.

Swift API – Smart API Testing Tool | React, Node.js, Express.js, FastAPI, MongoDB, Groq LLM

Live Demo | GitHub

- Built an API testing client using **React**, **Node.js** and **Express.js** with multi-method HTTP request execution.
- Integrated an AI error debugger using **FastAPI** microservice and **Groq LLM** for automated root-cause analysis on API failures.
- Implemented **MongoDB** persistent request history, workflow collections, and secure **JWT** authentication with HTTP-only cookies.
- Enforced API security using Express rate limiters, CORS policies, and deployed microservices on **Vercel & Render**.

Academic Engagement Portal | React, Node.js, Express.js, MySQL, JWT

Live Demo | GitHub

- Built a campus platform featuring multi-tier permission request approval routing across 5 administrative authority levels.
- Engineered Role-Based Access Control (**RBAC**) across 8 distinct user roles, event lifecycle management, and volunteer enrollment.
- Designed a relational **MySQL** database schema for campus clubs, events, approvals, and a real-time notification engine.
- Implemented secure **JWT** Bearer authentication, Winston security audit logging, and centralized **REST API** error handling.

TECHNICAL SKILLS

Programming Languages: C++, Python

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, Tailwind CSS, Bootstrap, REST APIs

Generative AI: LLMs, OpenAI API, Groq API, LangChain, Prompt Engineering, RAG, AI Agents, ChromaDB

Databases: MongoDB, MySQL

Core CS Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), System Design

Tools & Platforms: Git, GitHub, VS Code, Postman, Docker, Firebase

CERTIFICATIONS

Meta: Introduction to Front-End Development – Coursera

Built responsive and interactive web applications using **HTML**, **CSS**, **JavaScript**, **Bootstrap**, and **React**.

View Certificate

Full Stack Generative and Agentic AI with Python – Udemy

Learned **LangChain**, **Prompt Engineering**, **RAG**, **AI Agents**, and integrated **OpenAI APIs** into full-stack applications.

View Certificate

LEADERSHIP EXPERIENCE

- Volunteered in **PICT NSS** rural social programs, promoting teamwork, adaptability, and project management.
- Organized **Web Dev SIG (ACM Club)**, fostering mentoring, communication, collaboration, and technical team growth.
